

# WHO's data & health statistics journey

Getting the right data to the right person, at the right time in the right place and right format: Everyone's responsibility

Collecting and using quality data with integrity: a) is part of health system strengthening, b) depends on strong governance, and c) occurs at all 3 levels of WHO. Individual steps may not be linear and can vary and evolve over time, but all are necessary.

# Data Governance Framework

*The necessary standards, solutions and structures that ensure quality and integrity of all aspects of WHO's data & Health Statistics*

## Standards

### PRINCIPLES & POLICIES

- Data principles
- Data sharing policies (emergency, non-emergency & research)
- Open access policy
- Personal data protection policy
- Publishing policies

### DATA STANDARDS & GUIDANCE

- Classifications (ICD, ICF, ICHI)
- Reference data
- Coding standards
- GATHER guidelines

## Solutions

### DATA SYSTEMS & TOOLS

- World Health Data Hub (country portal, data lake, collaborative research environment, datadot website, data viz tools)
- DHIS2
- Monitoring dashboards
- SCORE
- WHS+
- RHIS toolkit
- HEAT/HEAT+
- HHFA
- Topic specific tools

## Structures

### WHO GROUPS

- Data Governance Committee
- Hub & Spoke Collaborative
- Health Data Forum
- GPW13 WGs
- Emergencies groups
- Data support mechanism

### PARTNERSHIPS

- Health Data Collaborative
- SDG GAP
- RGHS
- ACT Accelerator
