

Global Ecological Cascade Platform (GEPC) to buildup spiritually coordinated Primary Production, Value Addition and manage circular economies

Ecological and livelihood management

Formulation of cascade
ecological platform to
buildup cultural and
spiritual coordination
among the cascade
community and supply
chains

Improve Ecosystem
services and resilience
while optimizing energy
usage by the community
participation

Linking local and global
supply chains with
ecological cascades to
manage primary
production and value
addition

Management of
ecological cascades with
the public private and
community participation

Identification of
manageable ecological
cascades

Management of primary production and value addition

Sharing gluts with needy
communities

Formulate small medium
and large scale primary
production and value
addition units with the
public private
partnership

Edible Agroforestry
systems for urban and
semi urban areas

Increase edible
biodiversity in home
gardens
