

The SUN Civil Society Network invites you to participate in the Learning Route follow up webinar:

“Fostering Learning and Innovation in Nutrition”

Date: 31st January 2017

Duration: 10h15 – 12:00 (London, GMT)

Language: English (translation in French and Spanish will be available for the Q&A sessions)

Location: [Click here to access the webinar.](#)

At the end of October the SUN CSN, in collaboration with SUN Alliance Rwanda and PROCASUR Corporation, launched the [first international Learning Route exchange programme](#) in Rwanda. This six day peer-to-peer learning exchange brought together alliances from 9 African countries to learn from innovations being used by stakeholders in Rwanda including civil society to scale up nutrition. The Learning Route focused on key areas of intervention including multi stakeholder coordination, communication for behavioural change, social mobilisation, value chains and decentralisation. As result of the LR exchange, each Alliance submitted an “Innovation Plan”.

The Innovation Plans are small and time bound projects of approximately 6 months in duration developed to put in practice the learning gained during the exchange. The Innovation Plans have been submitted for competition and the winning plans will be communicated during the webinar.

Join the webinar to find out more about the learning and innovations developed by the Alliances.

Ethiopia: Nutrition Visibility and awareness through the media

- *Innovation area: Communication and Social Mobilization for behavioural change*

Nigeria: Improving Nutrition through Policy Implementation at all levels

- *Innovation area: Policy and Advocacy at subnational level*
